

Argus Storm1 Liquid Cooler

The high performance liquid cooler Storm1 for 120mm fan preparation offers an effective and quiet way to decrease the CPU temperature.

The Storm1 is a multi-socket cooler with 120mm fan. Thanks to the 4pin PWM-connection the fan operates depending on the temperature and cools your CPU with a maximum noise of 24.6dbA. The self-containing system of the Storm1 guarantees a maximum of security. The flexible wires are easy to install and offer a great leakage protection.

The massive cold plate module with copper base, in addition to the efficient water pump with powerful flow rate, guarantees an optimum of heat dissipation. Several mounting brackets for Intel®- and AMD™-Sockets are included and offer huge versatility.
