

Access Point 300Mbps Power On RPD-650

PowerOn

Overview:

RPD-650 is Mini type indoor ceiling access point designed specifically for business-class or home environments such as hotels, coffee shops, shopping centers, sporting venues, university campus and home. With 2T2R 2.4G MIMO technology, the data rate can be 300Mbps, max 32 users access into together. With the aesthetic ceiling design, RPD-650 can be deployed easily on ceiling or in crawlspaces. Integrated Power over Ethernet (PoE) allows installation in areas where power outlets are not readily available. 300Mbps high speed:Compliant with IEEE 802.11b/g/n, providing fast speed 300Mbps on 2.4G frequency, which make files transferring faster and video streaming smoother. Just enjoy yourself and link your world by this wireless device. The PoE port on the back panel allows both power and data to be carried over a single Ethernet cable to RPD-650 with the PoE adapter or PoE switch. It make RPD-650 can be deployed in area where power outlets are scarce or not available. Multi Operation mode to meet with different requirement It with Wireless Access Point, Router and wifi repeater operation mode, can be used for wifi coverage, home router or extend the exist wifi signal. Support AC management, VLAN, easy to manage RPD-650 support AP address server, it can be assigned IP address automatically when power on. What's more, compliant with AC management, easy to remote configure 200PCS AP's settings from PC. With VLAN function, it can be assigned SSID to different users

Key features:

Chipset: MTK7620N

Standards: 802.11N, 2T2R 300M MIMO Technology

SDRAM: 32MB

Flash: 4MB

Interface: 1*10/100 Mbps RJ45 Port,24V PoE

1*Reset Button, rest to default

1*DC Port, 12V/1A

Antenna: 2.4G MIMO OMNI antenna, 5dBi

Power: 12V(POE 24V)1A;110V/220V
