W-III RGB – pure extravagance

The W-III is a real eye catcher due to the three RGB-fans and the brushed aluminum application. The front is made of Tempered Glass and the translucent acrylic side panel gives a nice view on the built-in system. Various effects of the RGB-fans can be switched with the button in the front or by using the remote control. Further the interior offers space and connection options for additional Argus RS03 RGB-fans, a 120mm or 240mm Liquid cooler and several drives.

The case is equipped with removable dust filters in the cap and in the bottom of the case. USB 2.0, USB 3.0, HD-Audio front connectors and the fan controller are placed in the aluminum application.

✓Front panel made of tempered glass
✓Three 120mm RGB fans with remote control
